

Double Slider Display Unit Incorporating Satinlite and Clear Glazing

Double Glazing (Insulated glass units) WERS 6 star energy rated windows, utilising Architectural pultruded fibreglass.

The alternative to Timber, Aluminium , Aluminium thermally broken or uPVC..

Why Double Sliding windows ? It's simple:

Utilising the latest technology in window material Sliding windows to 4000mm in width are now possible.

Utilizing our unique coupling bar complete walls in a wide range of configurations are now available from Sovereign Windows & Doors.

Available in single or double glazing our customers can now take advantage of sophisticated combinations for that unique "glass on glass" experience.

The display unit at Willoughby Council incorporates two types of glass to assist in appreciating the wide range of glass available. Production units would be either all Clear float or the Satinlite obscure glass for privacy.

Maximising the window size in Double Sliding arrangement now allows our customers to obtain that much valued cross breeze.

All while enjoying an unobstructed view and helping to reduce your energy requirements.

Constructed to Australian standard AS2047 and all other applicable Australian standards.

3300pa ultimate strength and to 450 pa water penetration without a drop of water entering the room, high performance is a natural for Sovereign Windows.

Cleaning the glass is a breeze with simple sash removal from the inside - you'll never have to go outside to clean your windows again.

Higher performing Windows mean ongoing energy savings. With IGU's a reduction in air conditioning costs of up to 20% is achievable - hundreds of dollars per year in fact - even more if you specify Argon gas fill for a total of 35% reduction of heat gain or loss.

Ongoing comfort while saving on your energy costs could mean that in just a few years you have paid for your windows, all while enjoying the unsurpassed luxury of Double Sliding window performance.

Double Glazing is not just for cold climates. Here in Australia Sovereign Windows are just as affective at keeping heat out as keeping it in.
